FORMATION OF SUBCOMMITTEE—AI and DIGITAL HEALTH

The Commonwealth Medical Association is pleased to establish a subcommittee to advance, advocate for, and promote **AI and digital health** to benefit the medical fraternity and the community across the Commonwealth. This subcommittee will develop strategies that promote basic knowledge on AI and empower our fraternity to adopt digital health. Additionally, the subcommittee will collaborate with various stakeholders and national medical associations to take advantage of the penetration of digital health, use its potential to reach out to unreached people, and ensure ethical principles are followed in this rapid growth of AI.

I request that the chairman and convenor organize a Zoom meeting with all members to formulate a roadmap for this broader mission. Please make sure to notify all executive members about the Zoom meeting, as their support is crucial. CMA is dedicated to enhancing our collaboration with all affiliated organizations to empower one another. This collaboration will enable us to share valuable resources and best practices, fostering a unified approach to addressing the challenges we face in the healthcare sector. By working together, we can create a stronger network that benefits our organizations and leads to improved health services for the communities we serve.
