## CMA SUBCOMMITTEE on AMR initiative

The Commonwealth Medical Association is pleased to establish a subcommittee to advance, advocate for, and influence the CMA AMR initiative. This subcommittee will focus on developing strategies to combat antimicrobial resistance through collaboration with member countries and health organizations. By fostering innovative research and sharing best practices, the CMA aims to enhance global health outcomes and ensure effective treatment options for future generations.

I request that the Chairman and Convenor organize a Zoom meeting with all members to formulate a roadmap for this broader mission. Please make sure to notify all executive members about the Zoom meeting, as their support is crucial. CMA is dedicated to enhancing our collaboration with all affiliated organizations to empower one another. We must consolidate our efforts to confront these difficulties directly for the benefit of our community. Collectively, we can attain significant advancements and protect the welfare of those in need.
