CMA Subcommittee on CLIMATE CHANGE MITIGATION

The Commonwealth Medical Association is pleased to establish a subcommittee to advance, advocate for, and influence the climate change mitigation initiative in health care delivery. This subcommittee will focus on developing strategies that promote sustainable practices within health systems, as well as collaborating with various stakeholders to raise awareness about the critical intersection of health care and environmental sustainability. Its efforts aim to ensure that health care delivery not only addresses immediate health needs but also contributes to a healthier planet for future generations.

I request that the Chairman and Convenor organize a Zoom meeting with all members to formulate a roadmap for this broader mission. Please make sure to notify all executive members about the Zoom meeting, as their support is crucial. CMA is dedicated to enhancing our collaboration with all affiliated organizations to empower one another. We must consolidate our efforts to confront these difficulties directly for the benefit of our community. Collectively, we can attain significant advancements and protect the welfare of those in need.
